

“Your water quality
solution”

Water Intelli-buoy

What?

A floating device that will allow our customers to monitor the **water quality** in a **natural pool**.

Purpose?

Monitoring the water quality in swimming pools proves to be a time consuming activity. With in-telli-buoy this task will be **made easier**.

Features

Our product will provide the users with critical data e.g. **temperature** (water & air) and **turbidity**. Data will be available on a user friendly app.

Product service System

To provide our customers with the best experience, the product and its related services will be rented at a modest **monthly fee**, with all services (maintenance, advice, application ...) included.
