

Water Intelli-Buoy

Concept

Before Aquality, owning a natural pool implied being an expert in pool environment, maintenance and management. From now on Aquality will take these obligations away. With a quick look on your phone, you are able to monitor the water quality of your pool(s) and ask for professional assistance when needed.

Solar panel

With the integrated solar panel the buoy is energetically completely self sufficient.

WiFi

The buoy can be easily connected to the home WiFi and your personal mobile application.

Temperature

Frequently measures the air & water temperature to ensure an optimal swimming experience.

Turbidity

By measuring the turbidity the customer has a direct feedback about the status of his filtration system.

Product Service System

Along with the hardware comes a full service support:

- Periodically update of components
- Repair of the buoy if necessary
- Recycling of the old hardware
- Possibility to chat with our experts online
- Contact us for further information or help

Application

The buoy is connected via WiFi to your personal mobile application, which makes the data easy accessible. It also covers your task management and necessary informations about pool plants and fishes. For further help it is connected with our experts online.
